**closing discussion**
The Judaism, Science and Medicine Group (JSMG), is an international organization of natural and social scientists, philosophers, historians, physicians, rabbis, theologians and educators acting to promote and facilitate a close relationship between Jewish religion, cultures and values and the sciences for mutual benefit. The organization seeks to increase the knowledge and appreciation of the sciences, Judaism and their interrelation and to offer a forum to reflect and deliberate on the implications of scientific advances from Jewish perspectives. Working across denominational lines, the organization will disseminate its mission in academic and non-academic venues using a variety of media.
